

NPU Terminology Terms of Use

License & Terms of Use:

Permission is hereby granted in perpetuity, without payment of license fees or royalties, to use and copy the NPU Terminology content in all formats in which it is distributed by The Danish Health Data Authority, or supplied by a licensed NPU National Release Center for any commercial or non-commercial purpose, subject to the following terms and conditions:

1. To prevent the dilution of the purpose of the NPU Terminology of providing a definitive standard for identifying clinical patient observations, such as laboratory test results, users shall not use the NPU Terminology, its name and OID 1.2.208.176 and the code system identifier 'NPU' for the purpose of developing or promulgating a different standard, coding system or terminology.
2. The publications of NPU terminology content consist of three main sets of data: NPU definitions and codes, terms and terminological references, and NPU group structures (lists). Users may download, access or receive the publications of NPU Terminology content in English, as available from www.labterm.dk, www.npu-terminology.org or www.ifcc.org, or as original or translated versions published by a licensed NPU National Release Center. Users may use these publications and may modify them as permitted herein. Users may not use or modify NPU Terminology content publications for purposes unrelated to identification of clinical patient observations, unless prior written permission is granted by the NPU Steering Committee. To request written permission, please contact npu-terminology@sundhedsdata.dk
3. Users shall not change the meaning of any of the NPU codes, definitions or terms. Users shall not change the content of any part of the NPU Terminology publications. Users may add and distribute additional information to the NPU Terminology content for their own national or local use. Users should notify their National Release Center or the NPU Terminology management at The Danish Health Data Authority of any potential inconsistencies or corrections needed.
4. Users understand that the NPU Terminology is subject to change, addition, modification, or deletion by the NPU Terminology management in accordance with principles decided by the Scientific Committee on Nomenclature of Properties and Units or described in the IFCC-IUPAC series of articles on 'Properties and Units'. This series is freely available from www.iupac.org, but remains the property of the authors and publishers.

5. A user may use all or a subset of NPU definitions and codes to deal with the user's local requirements. A user may add local or national extensions, provided that the codes and content cannot be confused with NPU codes and content. In particular the code system identifier "NPU" must not be used for local or national extensions. Users may submit requests to their National Release Centers for new NPU definitions.
6. NPU code values and other content in part or full may be incorporated in programs, instruments and devices for the purpose of identifying clinical patient observations.
7. Users may incorporate portions of the NPU content into another document (e.g., an implementation guide or other technical specification) for distribution outside of the user's corporation or organization, subject to these terms:
8. Every copy of the document that contains portions of the NPU content must contain a reference to the NPU Terminology as the property of IFCC and IUPAC, and to the publication website www.labterm.dk
9. Any information in the document that is extracted from the NPU definition publications must always be associated with the corresponding NPU code.
10. Use and distribution of the NPU Terminology in ways that are not specifically discussed herein must be agreed with the NPU Steering Committee and stated in a written permission or a license statement. If a user has a question about whether a particular use of any of the NPU terminology content is permissible, the user is invited to contact the NPU Steering Committee by e-mail at npu-terminology@sundhedsdata.dk.
11. License to translate NPU terminology content is granted by the NPU Steering Committee only to National (or organizational) Release Centers. No right to create a translation or derivative work of any of the NPU Terminology is hereby granted, and the NPU Steering Committee reserve all other rights not specifically granted herein. Licensed translations are subject to the same license rights and restrictions contained herein.
12. The NPU Terminology management at The Danish Health Data Authority and the NPU Steering Committee welcome requests from National (or organizational) Release Centers for new NPU content (terms, codes, or associated material such as text descriptions and synonyms) and suggestions about revisions to existing content.
13. The names "NPU Terminology", "The Danish Health Data Authority" and "NPU Steering Committee" may not be used in a way that could be interpreted as an endorsement or a promotion of any product or service without prior written permission. Further, no right to use the trademarks of The Danish Health Data Authority is licensed hereunder. To request written permission, please contact npu-terminology@sundhedsdata.dk.

14. DISCLAIMER

IFCC, IUPAC, The Danish Health Data Authority, the Scientific Committee on Nomenclature of Properties and Units and the NPU Steering Committee, as well as any contributors who have provided NPU Terminology content, do not accept liability for any omissions or errors in the NPU Terminology content or any other materials published as related to the NPU Terminology. The publications are provided "as is," without warranty of any kind. Any expressed or implied warranties are hereby disclaimed, including, but not limited to, the implied warranties of title, non-infringement, merchantability and fitness for a particular purpose and warranties arising from a course of dealing, trade usage, or trade practice. Further, no warranty or representation is made concerning the accuracy, completeness, sequence, timeliness or availability of NPU Terminology content or any other materials published as related to the NPU Terminology, or any translations or and Units and the NPU Steering Committee, or any contributors who have provided NPU Terminology content, be liable for any direct, indirect, incidental, special, exemplary, derivative works of any of the foregoing. In no event shall IFCC, IUPAC, The Danish Health Data Authority, the Scientific Committee on Nomenclature of Properties reliance, or consequential damages or attorneys' fees (including, but not limited to, procurement of substitute goods or services; opportunity costs; loss of use, data, savings or profits; or business interruption) however caused and on any theory of liability whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of the NPU Terminology or of any other materials published as related to the NPU Terminology. This applies even if advised of the possibility of such damage, or if such damages were foreseeable. Some jurisdictions do not allow the limitation or exclusion of certain warranties or conditions, so some of the foregoing may not apply to you.
